PET/MRI is a new hybrid modality which is increasingly being used in clinical settings, although both clinical evaluation and technical optimization are still an ongoing process.

### **(PDF) PET/MRI: Applications in clinical imaging**

Clinical applications of PET/MRI  $\hat{c}$  439 ity standardized uptake values (SUV) derived from PET/MRI systems might be erroneously underestimated when compared to SUVs derived from PET/ CT (8). Therefore, SUVs derived from PET/MRI systems should be interpreted carefully until a larger experience with the new method of PET/MRI exists. In 2010, the first fully integrated whole-body PET/MR hybrid ...

### **PET/MRI: Paving the Way for the Next Generation of**

Positron emission tomography (PET) is a to-mographic imaging technique which allows non-invasive quantitative assessment of bio-chemical and functional processes. A range of positron emitters are available for use but <sup>18</sup>F (combined with FDG  $\hat{c}$  fluorodeoxyglucose) is the most commonly used. PET-CT has par-ticular value in cancer diagnosis and manage - ment but it does have value in many other ...
