Discrimination testing is a technique employed in sensory analysis to determine whether there is a detectable difference among two or more products.

Discrimination testing - Wikipedia

During a triangle test, a panelist is presented with one different and two alike samples. If possible, all three samples should be presented to the panelist at once, and the panelist should be instructed to taste the samples from left to right.

Triangle Test - Society of Sensory Professionals

Conformance testing â€™ an element of conformity assessment, and also known as compliance testing, or type testing â€™ is testing or other activities that determine whether a process, product, or service complies with the requirements of a specification, technical standard, contract, or regulation.

Conformance testing - Wikipedia
